PRESS RELEASE

In May 2013, KTMP conducted five public workshops and an online survey to determine public perceptions of the current state of our transportation infrastructure as well the long-range needs of the community. These workshops were held across the region in order to reach people in their own neighborhood. The primary topic of discussion was development of our 25-year Metropolitan Transportation Plan, "Mobility 2040."

KTMP staff collected data from paper maps showing locations and causes of congestion, as well as safety risks. Survey questions explored transportation issues with both multiple choice and comment sections. This allowed residents to help city and regional planners identify problem areas and propose possible solutions.

Selected data are as follows:

Rated Level of Congestion in KTMP area

Causes of Congestion in KTMP area

Observed Safety Hazards in KTMP area

"I currently bike or walk:"

■ Never, Yearly, or Monthly
 ■ Weekly or Daily

"I would if there were more paths, trails or bike lanes:"

Bike to Work, School, or Shopping

Bike for Fun or Exercise

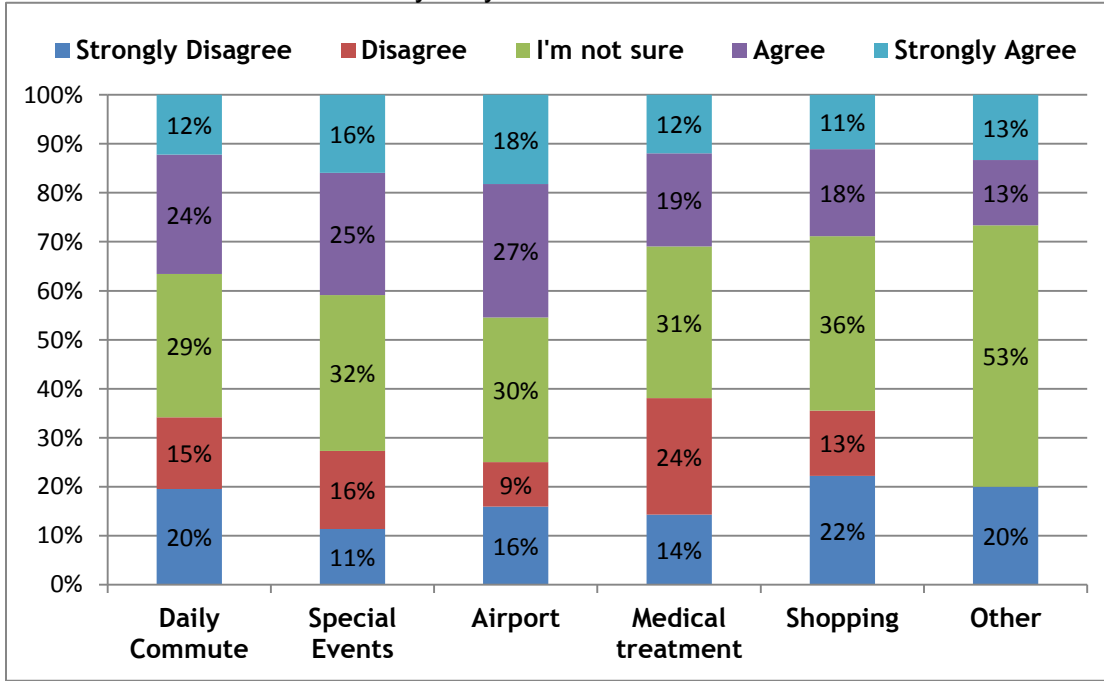

Walk to Work, School, or Shopping

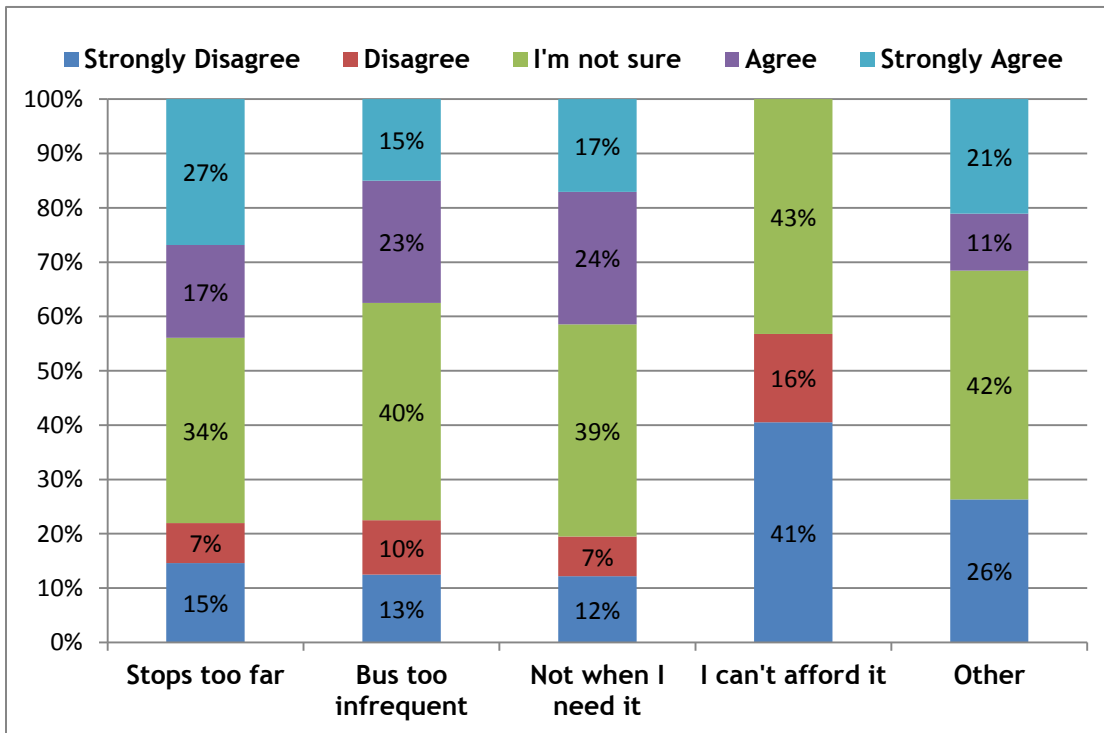

Walk for Fun or Exercise

Why do you ride the HOP?

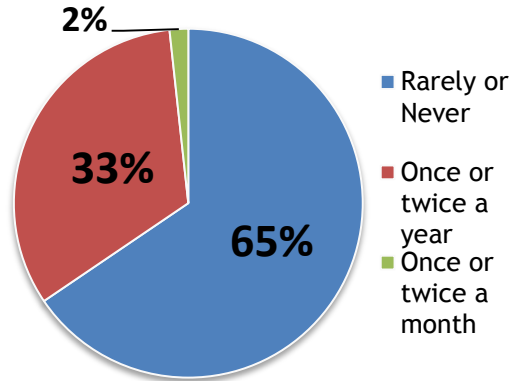

Why don't you ride the HOP?

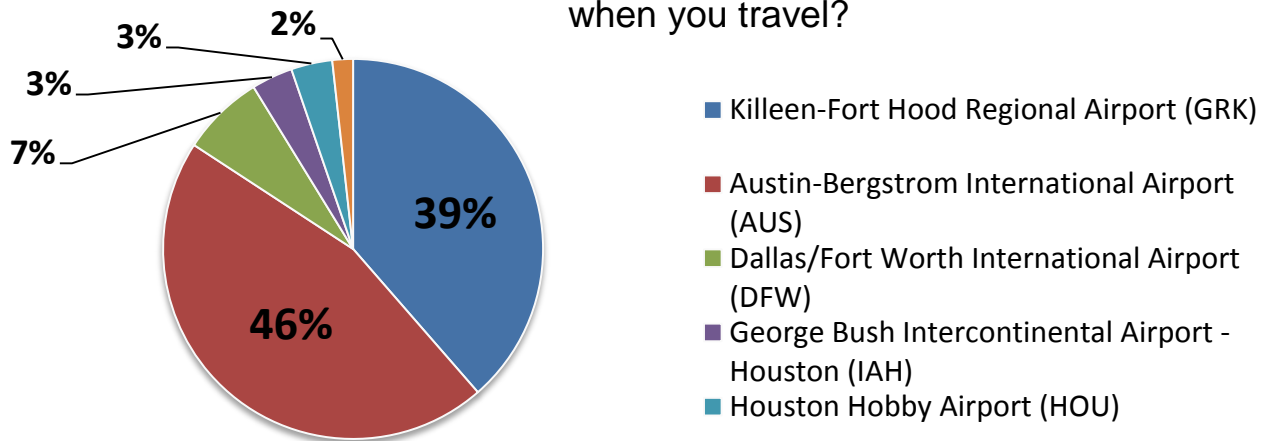

Would a passenger rail help in your daily commute?

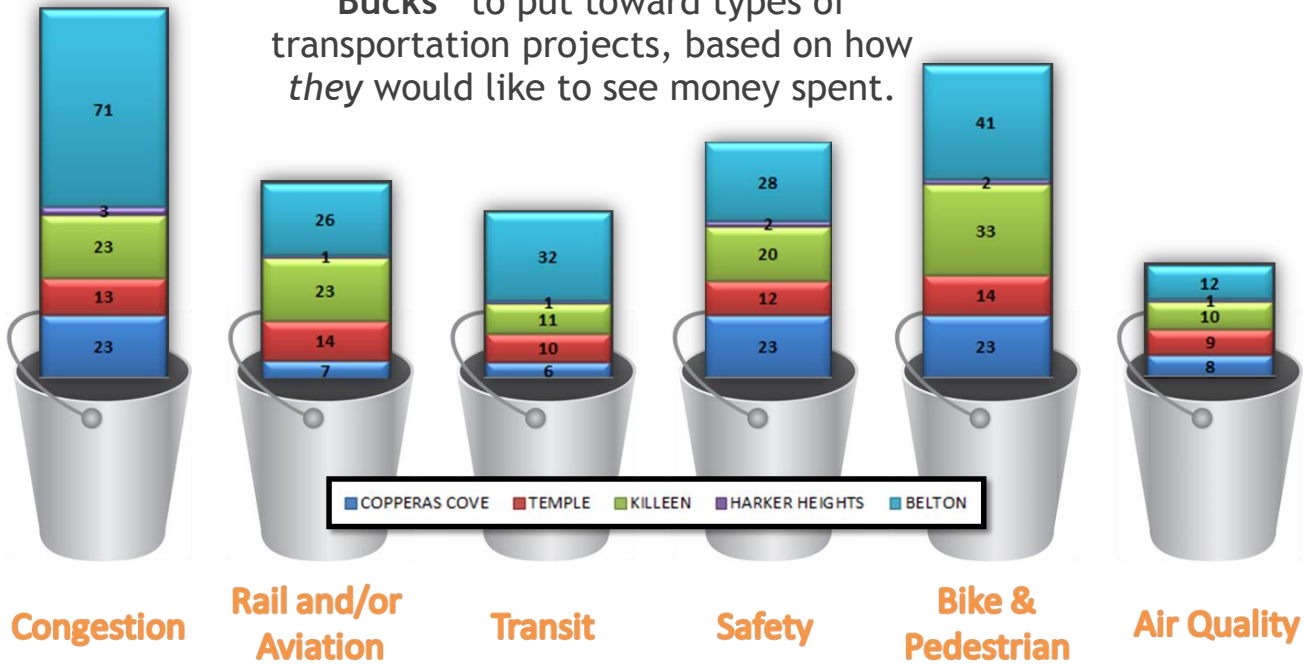

How often do you ride Amtrak?

What's your primary airport when you travel?

Upon completion of the workshop, participants were given 10 “KTMP Bucks” to put toward types of transportation projects, based on how they would like to see money spent.

Percentage of KTMP Bucks Spent by Category

Based on the participation at these public workshops, the Killeen-Temple area public is hearing about transportation planning involvement opportunities in the following methods...

Half of the participants made it to our workshops because of being told by informed citizens. 23% found out online, by our website, our partners’ websites, or social media. 18% were informed by articles in the newspapers.

Total number of participants: 61
 New Facebook “Likes”: 84
 New followers on Twitter: 26
 Online Survey responses: 23
