**Congestion Management
Process (CMP) Network
Segments List**

Reprioritization of Congestion Management Process (CMP) Network Segments

A Congestion Management Process (CMP) is a systematic approach for managing congestion that provides accurate, up-to-date information on transportation system performance and assesses alternative strategies for congestion management. This process follows an eight-step process which includes: develop regional objectives, define network, develop performance measures, collect data/monitor system performance, analyze congestion problems and needs, and identify and access strategies. KTMPO adopted the most recent full CMP in October 2016.

In 2018, KTMPO staff worked with Alliance Transportation Group to reprioritize CMP network segments. This process utilized updated data to refresh the CMP network, recalculate congestion performance for each CMP segment, and re-prioritize CMP segments. An amendment to the CMP was made in October 2018 to revise the Final Prioritized List of Congestion Hotspots for Highways and the Final Prioritized List of Congestion Hotspots for Arterials.

KTMPO has once again contracted with Alliance to update the CMP network as done in 2018. As part of this update, the CMP additions were based on public survey results from 2018. Year 2020 public surveys were not conducted due to travel patterns being outside of normal patterns, which could have biased the results. Year 2018 surveys were deemed more meaningful than a new survey would be.

The 2020 update to the CMP network was also based on assembling travel demand data, crash data and location-based data such as INRIX cell phone data and the National Performance Management Research Dataset. This data was utilized to analyze congestion levels on the respective CMP segments and calculate congestion scores and transportation system performance priority for each segment using performance measure criteria weights identified in the updated 2018 CMP which include Congestion Rank 25%, Congestion Rank Change 5%, Volume 20%, Safety Crashes 15%, Rear-End Crashes 10%, Transit 15%, School 5%, Public Input 5% = Total 100%.

In December, Alliance presented an overview of the CMP segment analysis; the identification of any new segments that should be added to the CMP network; and the preliminary prioritization of CMP segments based on the updated data.

A 15-day public comment period and one public forum was conducted for the proposed CMP amendment of revised Final Prioritized List of Congestion Hotspots for Highways and the Final Prioritized List of Congestion Hotspots for Arterials.

Schedule:

- December 2, 2020—TAC recommends approval to initiate public involvement for proposed reprioritized CMP Network Segments list;
- December 16, 2020—TPPB approves initiation of public involvement for proposed reprioritized CMP Network Segments list;

WHAT IS CONGESTION MANAGEMENT

Congestion management is **the application of strategies to improve transportation system performance and reliability** by reducing the adverse impacts of congestion on the movement of people and goods.

A congestion management process (CMP) is a systematic approach for managing congestion that provides accurate, up-to-date information on transportation system performance and assesses alternative strategies for congestion management that meet state and local needs.

The CMP results in a **list of roadway segments which are prioritized based level of congestion** occurring along each segment, as well as strategies to address congestion in the region.

2020 CMP UPDATE

Why Reprioritize CMP Segments?

- Reflect real-world changes to the roadway network that impact congestion
- Take advantage of updated data sources
- Monitor the effectiveness of congestion management strategies and transportation system improvements

What is the Process?

- Collect up-to-date data
- Update CMP network to reflect changes to data and data availability
- Calculate congestion performance measures
- Revise evaluation criteria, if needed
- Rank/re-prioritize CMP segments

Item 6:

FY21-24 TIP and 2045 MTP

Amendment for Project:

B45-03 – Belton 13th Ave

Sidewalks

Amendment to the FY21-24 TIP and 2045 MTP

MTP Background

The MTP is the 25-year long range planning document for KTMPO. The MTP includes a short and long-range prioritized project listing incorporating projects expected to be funded within the document's 25-year planning horizon. The project listing is fiscally constrained based on the projected funding the MPO expects to receive in the 25 year planning period. The document also lists regionally significant unfunded projects. Projects must be included in the funded section of the MTP in order to receive state or federal funding.

TIP Background

The TIP is a 4-year transportation planning document that includes a detailed listing of projects reasonably expected to begin within a four-year period. The current TIP covers FY21 through FY24. Projects included in the TIP must be consistent with the MTP and are chosen based on regional priority and available funding. An amendment to a TIP is not completed until the change has also been included in the STIP—Statewide Transportation Improvement Program.

Amendment to the FY21-24 TIP and 2045 MTP:

Amendments to the TIP and MTP are needed to:

Update the let date, cost estimate, work description, and project name for Belton's 13th Ave Sidewalks project, B45-03.

- Belton provided KTMPO with an updated let date for project B45-03.
 - **Original Let Date:** 2022
 - **Revised Let Date:** 2023
- Belton provided KTMPO with an updated cost estimate for project B45-03. The federal cost share of the project will not change.
 - **Original Cost Estimate:** \$423,611
 - **Revised Cost Estimate:** \$539,233
- Belton provided KTMPO with an updated work description for project B45-03.
 - **Original Work Description:** Construct 5 ft sidewalk on the north side of 13th Avenue from Main St to Woodall; Transition to 10 ft SUP from Woodall to Waco Rd.
 - **Revised Work Description:** Construct ADA compliant ramps, sidewalks, and crosswalks and add striping for a bike line on the south side of the roadway.
- Revised description of work no longer includes plans for a shared use path.

- **Original Project Name:** Belton 13th Ave Sidewalk & Shared Use Path Project
- **Revised Project Name:** Belton 13th Ave Sidewalk Improvements

Schedule:

Action Needed: No action needed; for discussion only.

KTMP Public Comments

FY21

Date	Name	Means of Public Comment	Public Comment	Date Comment Was Presented to TAC	Public Comment Topic	Jurisdiction
12/22/2020	Sam Listi	Public Hearing	The 13th Avenue project is important to the community and is fully endorsed by the City Council. Some changes have been made to the specifics of the project, but the overall integrity is maintained. The project will provide great continuity in the city's overall sidewalk/trail system and will increase access from the center part of town to the expanding Heritage Park.	1/13/2021	Roadway	Belton
12/22/2020	Bob van Til	Public Hearing	Encouraged adoption of the project and recommended that the revised project be included in the updated TIP.	1/13/2021	Roadway	Belton
12/22/2020	Angellia Points	Public Hearing	Spoke in favor of the project. Proposed project scope is to reconstruct the sidewalk on the south side of the street as needed to be compliant with ADA. We are planning to install ADA compliant ramps on the south side at each street crossing as well as a crosswalk to Park Lane. The project would also connect two TxDOT roadways, Main Street (SH 317) and Waco Road (FM 817). The project would also add striping for bike lanes. Believes project provides much needed connectivity for Belton.	1/13/2021	Roadway	Belton

¹Project score, project ranking and prioritized list is based on the scoring criteria at the time those projects were selected for funding.

²CMP network is based on the network when that project was selected for funding and/or when project was submitted to KTMPO.

³Environmental considerations is based on the environmental conditions when that project was selected for funding and/or when project was submitted to KTMPO. Use key below for identification purposes.

⁴Fiscal Constraints are determined by inputs into the TRENDS model as approved on March . Short range funding is estimated funding for FY2019-2028 and Long Range Funding is estimated funding for FY2029-2045

⁵Project is a combination between C35-02a and C35-02b. Projecct C35-02b was the top prioritized livability project.

⁶Project H40-03 Chaparral Rd original score, project ranking, and prioritized list order was 60.51, 25 and 30 respectively.

⁷KTMPO received a total of 69 roadway projects with an estimated total cost of \$1,008,785,911. Roadway prioritized list was recommended by TAC on November 28, 2018. During this process, five bonus points were added to projects that lie on a freight corridor as notated in the Regional Multimodal Plan as approved by TPPB on October 24, 2018. After assigning bonus points, each submitting entities' top roadway project was moved to the top of the list. The order was based on the total number of points for those top roadway projects. All remaining projects were ranked based on total project score. Other changes to the ranked list included swapping projects N40-03 and H30-05 and moving project H40-03 to the unfunded list since K30-13 overlaps with this project. Each change was discussed and agreed to during the 11/28/2018 TAC meeting. Prioritize list is not the order of funding and allocation of funds is based on various factors such as but not limited to project ranking, project readiness, funding availability and project need. During discussion, it was decided that project T15-06k will retain its rank, however, this project will be skipped if this project is a candidate for funds.

⁸Note: KTMPO recieved a total of 27 livability projects with an estimated total cost of \$34,939,442. Livability ranked list was recommended by TAC on November 28, 2018. During this process, five bonus points were given to projects that were deemed a priority by BPAC (C35-02b, T40-13, N40-04, B45-01, and B45-05). Bonus points were proposed to projects B45-03 and B45-05 from the City of Belton based on fatalities that occurred in 2018 along these routes. Crash rates were calculated based on data from 2013-2017. Project B45-03 recieved four bonus points as discussed by TAC at the November 28, 2018 meeting. Project B45-05 would've recieved bonus points to accomodate the fatality along this route, however, this project was given the maximum number of bonus points since this project was a BPAC priority route. After bonus points were assigned each submitting entities top livability project was moved to the top of the list. Each submitting entites top priority livability project was ranked based on total score. Prioritize list is not the order of funding and allocation of funds is based on various factors such as but not limited to project ranking, project readiness, funding availability, and project need.

⁹Funding/Fiscal Constraint Notes (Cat 2, 7, 9, 11):

Short Range funding amounts (0-10 years) come from the latest TxDOT Unified Transportation Plan (UTP). Long Range funding amounts (10-15 years) are determined by outputs from the TRENDS model (see note ⁴)

How projects in the list are funded:

White - Projects in the TIP are listed first, their total estimated cost is deducted from the total UTP fiscal constraint.

Green - The remaining UTP funding is then allocated to the next highest ranked projects from both the Roadway and Livability tracks until the funding cap is reached. Green colored projects are projected to receive funding within the first 10 years of the planning period.

Blue - Projects following the Short Range funding section are allocated funds from the estimated Long Range MTP funding from highest ranking on down until the funding cap is reached. Blue projects are projected to receive funding during the last 15 years of the planning period.

Orange - When all estimated funding sources have been exhaustesed, any remaining projects are listed from high to low in the Regionally Significant Unfunded list. Orange projects are NOT projected to receive funding during the planning period

Yellow - Projects that are unscored are listed at the bottom of each section and have no estimated timetable for receiving funding.

Note of Roadway vs Livability Tracks:

Projects in the Livability Track are allocated funding from the latest Category 9 funding estimates only.

Porjects in the Roadway Track are allocated funding from the latest Category 2 and Category 7 estimates.

Current UTP Estimates by Category (2021-2030):	Current MTP Estimates by Category (2030-2045):
Category 2 - \$189,232,733	Category 2 - \$115,800,000
Category 7 - \$61,317,869	Category 7 - \$216,900,000
Category 9 - \$3,940,100	Category 9 - \$41,600,000
	Category 11 - \$31,400,000

*Note - funding for projects in this list is not guranteed unless the project is listed in the TIP, all other project funding is subject to change
